

## **VISION**

'To Deliver Excellence in Healthcare through Innovations and Collaboration' To provide the underserved population of the state and beyond with access to quality, cost effective healthcare services, to prevent and relieve human sufferings and enrich the human mind and spirit, thus making a present and lasting contribution to the health and welfare of the people and to become a premier institution, recognized nationally as well as internationally. To create an environment where teaching, non-teaching staff and students are passionate about their work and education, where patients of all socioeconomic backgrounds are provided the best available care. The Banas Medical College & Research Institute believes that by treating a disease, we may succeed or not, but, by treating a person in her/his physical, spiritual and psychological needs, the patient benefits regardless of the physical outcome. Personalized medical care with kind hearts and attentive hands will help in revitalizing medicine, to provide global leadership in human development, excellence in education and healthcare. By highlighting our motto “Service With Love”, we commite the best quality healthcare for our patients in the best way to get achieve faster recovery.

## **MISSION**

To improve the health of individual patients and population by providing safe, evidence-based, humanistic care in a manner that is efficient, equitable and always intending to advance in the field of medicine through leadership in education, research and innovation. The Banas Medical College & Research Institute recognizes the fact that it is our outstanding, dedicated staff and students' team work that would make our mission, vision and principles a reality to be a provider of :

- High quality, safe, cost-effective and sustainable healthcare services
- A working environment that is underpinned by values and behaviors
- Committed for patient-centred care
- Excellence in Health care Education
- Respect for life
- Integrity
- Academic freedom, freedom of speech and the right to differ
- Tolerance of diversity and respect for different ideologies
- Openness, transparency and democratic decision making

To improve the overall health status of people by providing comprehensive quality health care of high standards and to maintain excellence in all activities relating to Health Care, as a model in co-operative sector. Always to uphold ethical values and human dignity.
